Unlike other special economic zones of Latvia, the location and area of each maximum territory that can be granted SEZ status has not been determined in the municipalities included in the Latgale planning region. In order for the process of determining the areas of territories to be flexible and to be able to adapt to the demand of the business environment, the territories to be included in the Latgale SEZ can actually be located anywhere in Latgale according to the discretion and needs of the company. Companies operating in the territories of the Latgale SEZ have the opportunity to apply for direct tax benefits.
